For 32-bit VSTA tools: Tools/Visual Studio Tools/Visual Studio Tools for. A free place to download all my code, to every programming language imaginable. It's a tool shop for GIT, GitHub, BitBucket, GitLab, code.Q: PowerShell script to read from text file and add data to end of an object I have a large text file containing over 500.csv files, I'm trying to use powershell to read from the text file and add the data to an instance of a class, however I cannot seem to figure out how to do it. From what I'm reading, I need to iterate through the file and assign the data to an object property? I have a class type as follows: class Address { public string AddressLineOne {get; set;} public string AddressLineTwo {get; set;} public string Town {get; set;} public string County {get; set;} public string PostalCode {get; set;} public string Country {get; set;} } Edit: The content of the file is something like this: 0001, Adelphi 1234, Tech City, Surrey, UK, USA, 001 The first column is always the year. There are multiple years in the file, the following lines are the corresponding addresses. The.csv file is split into lines in PowerShell A: Using this code: \$content = Get-Content -Path -Raw Add-Type -Path \$content | ForEach-Object { Add-Type -MemberDefinition \$\_.Split(",")[0] -Name "AssemblyName" -Value \$content } Should do the trick. Multiple trajectories to obesity among urban youth: the effects of gender and race/ethnicity. The purpose of
